

Event Report – End of Day Four

Car 40: We have had a good morning, not excellent, but good. We were very lucky that very time we met a car coming the other way they were very friendly and pulled in to let us through.

Car 52: It was good up until the right left triangle on the regularity, I'm not sure where my head was, but I took a right and then another right which messed up our time.

Car 63: It's a very good morning with a wonderful regularity it was very challenging but we loved it.

Car 46: We didn't have any problems with the triangle on the regularity, we were just a little slower than we'd have liked.

Car 90: It has been a great morning but we didn't do as well as we'd have liked, I think we still need more coffee!

Car 35: We've been having trouble with the gearbox so we couldn't reverse so after we took a wrong turn on the regularity we had to find a bit of road to swing around on.

We also witnessed car 35's crew running out of the coffee halt after getting carried away in chatting and not realising what time they were meant to be checking out!

Car 61: Absolutely disastrous, mis-read an instruction and went miles wrong – simple stuff but we have enjoyed it otherwise.

Car 84: We thought we were doing well until we saw two other cars heading in different directions. Had a drama at the last control but we sorted it in the end.

Car 69: Really good regularities, but a little tricky control at the end caught us out
